FLOWPLANT

Bespoke High Pressure Fluid Engineering

EXPERTISE WHICH FLOWS

Flowplant is a supplier of fluid pumping systems, hydrostatic test units and high pressure umbilical flushing equipment. We specialise in supplying the offshore and onshore energy sector, chemical plants, oil refineries and utilities.

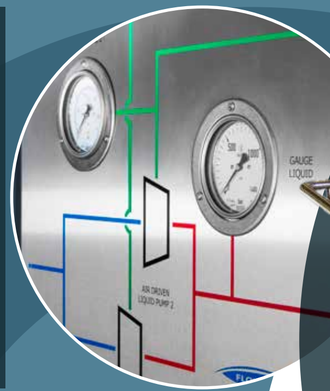
A long established SME with assembly plants in the UK and USA supporting a worldwide network of distributors. The special projects division designs and builds bespoke equipment to customer specifications.

Our customers comprise some of the world's most prestigious and successful companies. We export to all the major regions of the world.

To ensure Flowplant has the ability to offer it's clients such class-leading expertise, it has invested not just in technology but also in it's people.

This expertise is the reason Flowplant successfully partners with the most prominent companies on a range of high profile projects.

- **PROJECT MANAGEMENT**
- **INDUSTRY EXPERIENCE**
- **OPERATOR TRAINING**
- **WEALTH OF KNOWLEDGE**
- **DELIVERY ON TIME**
- **BESPOKE DESIGN OPTIONS**
- **COMPLIANCE ASSURED**
- **PROJECTS TO BUDGET**



WORLD CLASS TECHNOLOGY

DESIGN EXCELLENCE

Our engineers and project managers are fully conversant with the latest EU directives governing the design of high pressure pumping systems. When more specialist equipment is required we can manufacture to meet ATEX, Norsok and IEC Ex regulations.

HYDROSTATIC TEST UNITS

Flowplant have a range of standard fast fill hydrostatic test units operating at up to 1,400 bar and we will also design bespoke units to customers requirements.

FLUSHING UNITS

The Harben® pump is being used in most major offshore energy regions providing a reliable and efficient method of flushing umbilical lines and hydraulic equipment to meet ISO4406 and SAE AS4059 cleanliness codes. The pump carries ATEX approval for use in Zone 1

HPU'S

Low viscosity oils and subsea control fluids can be pumped at pressure by Harbens unique diaphragm pumps. Many of the flushing units we manufacture are dual purpose and can be used as HPU's.

WATER BLASTERS

Our range of Harben® and Aqua® water blasters offer simple and cost effective solutions to the everyday cleaning problems encountered in all industrial installations.

INNOVATION
INTEGRITY
EXCELLENCE

WE

Are an innovative and focused engineering company.
Encourage open and honest partnerships in all our activities.
Care deeply about what our customers think of our products.

Work hard to ensure that the projects entrusted to us are delivered in a safe and environmentally aware manner which exceeds expectations.

PARTNERSHIP WITH CLIENTS

SAFETY AND QUALITY

RELIABLE AND CONSISTENT

FLOWPLANT

Flowplant has been manufacturing high pressure pump equipment in the UK for over 50 years, and in that time have built a reputation for technical excellence, high quality and reliability.

Contact our friendly team to discuss your pumping requirements, and be confident that you will receive the best service possible.
